

# About the Project

## FACT SHEET – Maryborough Pump Track

# 2

### Overview

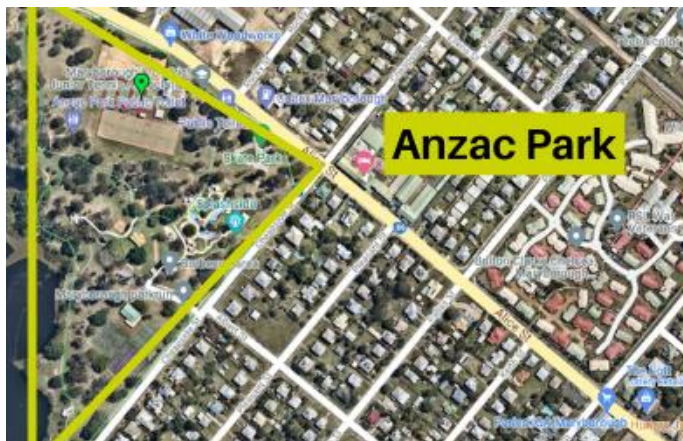

Council is committed to continuously maintaining and improving our parks and open spaces, including providing facilities that are enjoyable for people of all ages and abilities - to support an active and healthy lifestyle.

After community support for the Craignish Pump Track, Council received many community requests for pump track development.

The 2021 Pump Track Feasibility Study highlighted that there is sufficient popularity and demand to establish additional Pump Tracks within the region. Council recognises the popularity of these recreation facilities and believe that two new parks in Maryborough and Hervey Bay will help in achieving active lifestyle and wellbeing aims.

The study identifies a number of economic and social wellbeing benefits, and nominates preferred locations in Maryborough and Hervey Bay.

In February 2021 Council resolved to commit to the construction of a track in the two cities (Maryborough and Hervey Bay). Council is now consulting with the community on the two potential locations for Maryborough.

# Where do you want the Maryborough Pump Track?

## Why is Council building a Pump Track?

Council recognises that pump tracks are becoming popular recreation facilities across the country – with a recent feasibility study highlighting there was demand for pump tracks in the region.

## Why is Council looking at these sites (Anzac Park and Brendan Hansen Park)?

The feasibility study identified several potential locations for both the Maryborough and Hervey Bay pump tracks. Council has undertaken further review of the sites with two sites identified as potential options for Maryborough. Council is now seeking feedback on the two potential sites – Anzac Park and Brendan Hansen Park. We want to hear from residents which location they prefer.

Council would like to see the Hervey Bay track built at the Fraser Coast Sports and Recreation Precinct in Nikenbah, subject to community consultation on a revised Sports Precinct Master Plan in early 2022.

## Who is funding the project?

The Maryborough and Hervey Bay pump track projects will be funded by Council and Round 4 of the Queensland State Government's Works For Queensland funding.

## How can I be involved?

The Maryborough project will include three engagement phases, Phase 1 – Locations, Phase 2 – Design Development and Phase 3 – Review of Draft Design.

To facilitate the Phase 1 engagement Council will be conducting a variety of activities, including a survey, submissions and drop in sessions. The survey and submission process will run from Thursday 16 December 2021 to 11:55pm Sunday 16 January 2022.

The community are encouraged to visit the project page for more information on the engagement activities and provide their feedback: <https://frasercoast.engagementhub.com.au/pumptrack-mb>

Community can also register through the survey to be involved in the Design Phase early next year.

## When will the pump track be built?

Under the funding arrangement Council will design and deliver the two pump tracks over the next three years.
