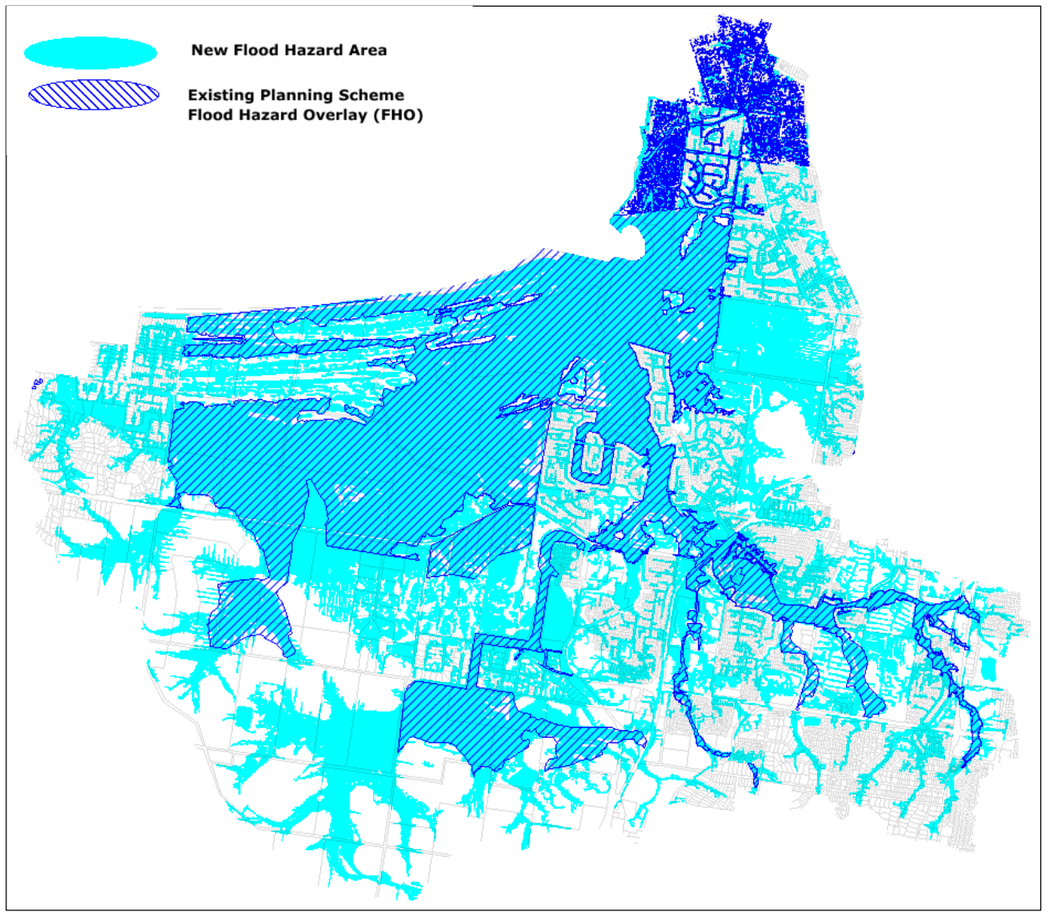
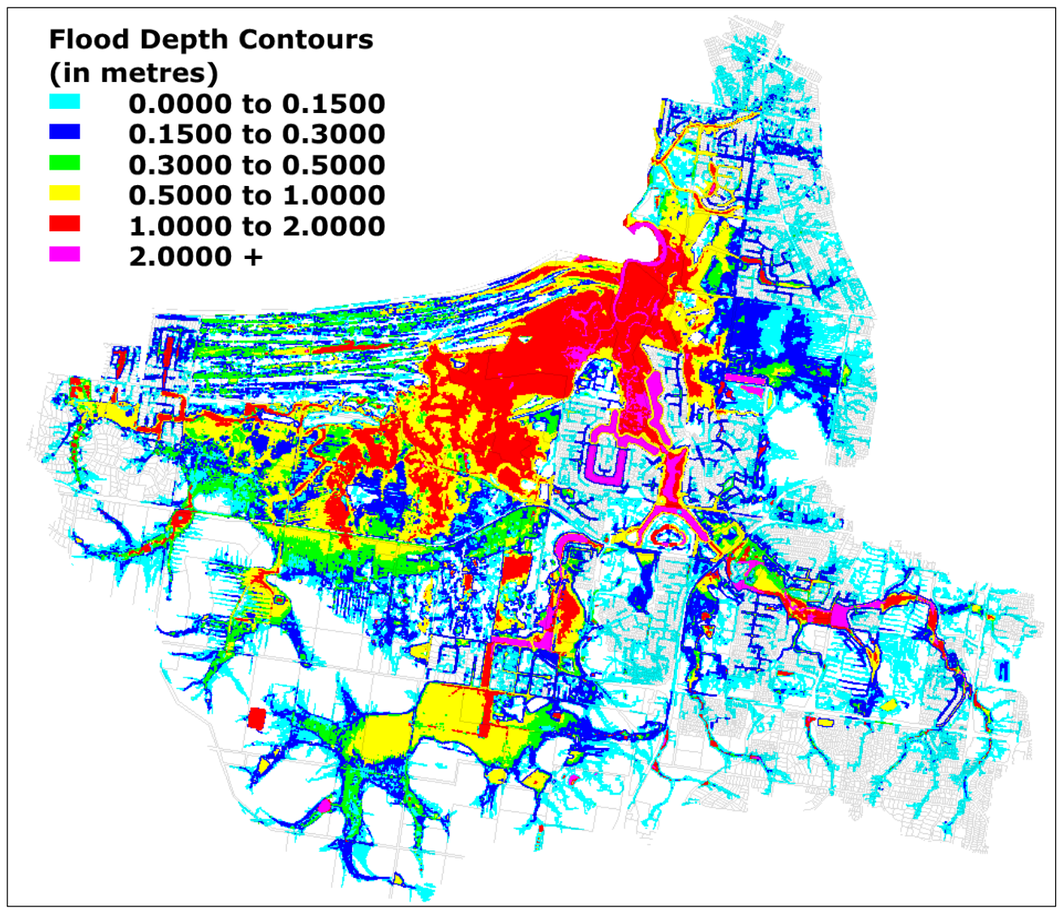
Eli Creek Catchment Analysis - Flood Risk				Total Properties Impacted (Existing vs New)		Number of Properties affected by a change to the FHO			Total Number of Properties with no FHO Impact
Catchment	**Purpose**	**Scope**	**Outcome**	Total Existing FHO Impact refer footnote (i)	Total New FHO Impact refer footnote (ii)	Added FHO Impact refer footnote (iii)	Removed FHO Impact refer footnote (iv)	Retained FHO Impact refer footnote (v)	No FHO Impact refer footnote (vi)
Eli Creek	To update existing catchment modelling and mapping outputs to reflect development changes, improved topographic data and best practice flood modelling outcomes for a whole of catchment flood risk analysis for the 100 Yr ARI design flood event	Whole of natural catchment analysis undertaken in line with best practice to provide defined flood levels for building, development and planning purposes	Updated Flood Hazard Area map extents and defined flood levels	**1366**	**4353**	**3296**	**264**	**1057**	**3095**
				TOTAL AFFECTED BY CHANGE TO FHO		**4617**			

Footnote:

i	*Total Existing FHO Impact*	*properties triggered under existing Flood Hazard Overlay*
ii	*Total New FHO Impact*	*properties triggered under the proposed, new Flood Hazard Overlay*
iii	*Added FHO Impact*	*properties which are added/newly triggered under proposed, new Flood Hazard Overlay but do not have existing Flood Hazard Overlay trigger*
iv	*Removed FHO Impact*	*properties which have an existing trigger under the existing Flood Hazard Overlay but have been removed in the proposed, new Flood Hazard Overlay*
v	*Retained FHO Impact*	*properties which were triggered under existing Flood Hazard Overlay and remain under the proposed, new Flood Hazard Overlay*
vi	*No FHO Impact*	*No previous OR new FHO impact: properties which are not triggered under either the existing Flood Hazard Overlay or the proposed, new Flood Hazard Overlay*



Comparison of Current FHO v. Proposed, new FHO Mapped Extents



Flood Depth Detail Map
