

# Oleander Park Upgrade

## FACTSHEET – 1

### Overview

Council is upgrading **Oleander Park**, in Kawungan, to renew and enhance the recreation space for local children and families. The upgrade includes new playground equipment, a shaded sand play area, a concrete bike track, a multi-use half court, and improved embellishments.

During August 2025, Council is inviting the local community to provide feedback on the design and elements through an online engagement process. Local community input will help ensure the upgrade reflects the needs and values of nearby residents.

This upgrade supports the **Fraser Coast Park Strategy 2041** and reflects our commitment to safe, inclusive and vibrant parks for the community.

### Why is Council upgrading Oleander Park?

Oleander Park is a much-loved local park in Kawungan. This upgrade will provide updated infrastructure and a more inclusive and engaging space that encourages active play and better reflects the needs of the local community—especially young families.

### What is a “Local Recreation Park” and what does that mean for the upgrade?

Local recreation parks are designed for short visits and casual, unstructured play. They are intended to serve people within a 1km or 10-15 minute walking distance.

As such, they do not typically include:

- Public toilets
- BBQs
- Parking
- Sports/ Events facilities or lighting for night use

The Oleander Park upgrade is being designed with this purpose in mind—but it will still exceed local park embellishments standards.

### Oleander Upgrade – Elements and Features

The concept design includes a mix of traditional and imaginative play and recreation elements:

#### Play & Active Features

- **New playground with large tower, swings and other smaller elements** – suitable for toddlers to age six
- **Concrete bike track** with weaving poles, berms, play huts, and bike ramp
- **Multi-Goal half court** including hopscotch, and handball markings

#### Infrastructure & Embellishments

- **Shade and Picnic shelters** and **sandstone seating** for families
- **DDA-compliant carpark** and new **pathways to shelters to improve accessibility**
- **Water bubbler, bike rack, and bins**
- **Increased landscaping** including more shade trees and plantings

## How can I have my say?

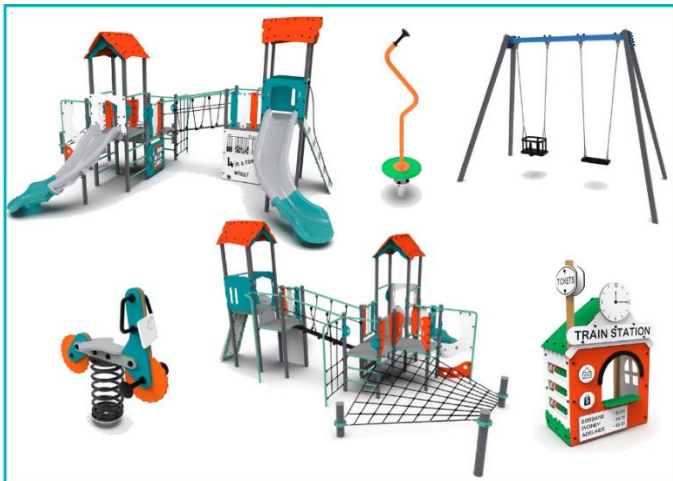

Council is seeking feedback on the design and elements to make sure the park reflects the values and needs of local residents.
